

# UWRL Researchers Among Those Chosen to Receive Part Of An EPA Grant Totaling

**04/20/2016**

Stormwater management is changing, and UWRL researchers are among the experts who will decide just how that happens. R. Ryan Dupont and several other UWRL and USU faculty members will study the feasibility of harvesting stormwater to recharge underground aquifers as part an EPA grant that totaled \$3.3 million and is split between five proposals nationwide.

The USU portion will be \$774,283. For more details on this story, please see the [USU College of Engineering press release](#).
